DETAILED ACTION

Election/Restrictions

1. Applicant's election without traverse of claims 4-7 in the reply filed on 7/9/2006 is acknowledged.

Claim Rejections - 35 USC § 112

1. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

2. Claims 4-7 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the enablement requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to enable one skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention. In particular, the last limitation of claim 4 states, "the length of the case section is dependent upon water weight volume of the casing, the bore diameter of the gun barrel, and the weight of the bullet." There is no indication, in the specification or claims, as to how it depends on these variables, and further, what value might be specified by these variables.

3. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

4. Claims 4-7 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Art Unit: 3641

5. Claim 4 recites the limitation "the action" in line 4, and recites the limitation "the casing" in the last line. There is insufficient antecedent basis for these limitations in the claim.

6. Claim 4 recites "an efficient 50 caliber gun cartridge." Although the specification implicitly defines efficient in paragraph 12 by stating that inefficient cartridges burn a more-than-average amount of powder, there is no indication what an "average" amount of powder is. Thus, it is unclear what is encompassed by the term "efficient."

7. A broad range or limitation together with a narrow range or limitation that falls within the broad range or limitation (in the same claim) is considered indefinite, since the resulting claim does not clearly set forth the metes and bounds of the patent protection desired. See MPEP § 2173.05(c). Note the explanation given by the Board of Patent Appeals and Interferences in *Ex parte Wu*, 10 USPQ2d 2031, 2033 (Bd. Pat. App. & Inter. 1989), as to where broad language is followed by "such as" and then narrow language. The Board stated that this can render a claim indefinite by raising a question or doubt as to whether the feature introduced by such language is (a) merely exemplary of the remainder of the claim, and therefore not required, or (b) a required feature of the claims. Note also, for example, the decisions of *Ex parte Steigewald*, 131 USPQ 74 (Bd. App. 1961); *Ex parte Hall*, 83 USPQ 38 (Bd. App. 1948); and *Ex parte Hasche*, 86 USPQ 481 (Bd. App. 1949). In the present instance, claim 4 recites the broad recitation "the case section has a length ranging from 1.9 inches to 2.5 inches", and the claim also recites "the length of the case section is dependent upon water weight volume of the casing, the bore diameter of the gun barrel, and the weight of the bullet," which is the narrower statement of the range/limitation.

Art Unit: 3641

8. Claim 5 recites the limitation “water weight” where previously there was recited “water weight volume.” If Applicant intends these to refer to the same value, corresponding terminology is requested.

9. Claim 7 states that the case section, shoulder section, neck section, and free bore section have a maximum length of 4.0 inches. It is unclear whether they individually have a maximum length of 4.0 inches, or in combination. Further, paragraph 25 of the Specification states that the overall case length is 2.4 inches. Appropriate clarification is required.

10. Based on the above rejections and upon reading of the claims, it is unclear whether Applicant has intended to claim a gun chamber *for use with* a cartridge or a gun chamber *in combination with* a cartridge. The claims are replete with functional language (e.g. for use with, configured for, etc.) with respect to the cartridge, but place limitations on the cartridge as well. As such, art considered relevant to the present application will be cited but no art rejections will be made.

Conclusion

11. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
